

as you hear from the school. Keep in mind that these electives cannot be dropped once plans are approved by both the preceptor and the College of Medicine. If plans do not materialize, you may have few choices remaining for you, so please begin this process in a timely fashion.

Comments: This section is the place to give information such as why you must have your choice for Period 6S1, but that all others can be shifted if necessary; or, what period you must be free for vacation. You should decide for yourself (and make clear on the form) which is more important to you – the order in which you take your electives or that you will take each of them anytime you can get them. If more students wish to subscribe to an elective than can be accommodated, names will be drawn at random to ensure fairness. If you have further questions about scheduling, the guidelines presented in this Electives Manual or anything involving your senior year, ask your advisor, the Associate Dean for Student Affairs or the personnel in the Student Records Office.
